

Business Tools for Startups and Dreamers

Starting a business can feel like being lost in a jungle—you need the right tools to hack through the vines and make a path. Whether you're naming your business, picking a domain, or validating your big idea, these tools will help you find your way.

FlowKitten

A free business idea validator that helps you test whether your concept has real-world potential. It's a great first step before you invest time or money into your next big thing.

Namelix

Namelix is perfect for generating creative and brandable business names in seconds. Simply input a few keywords, and it'll serve up unique options tailored to your vibe — no more brainstorming for hours!

Google Trends

Analyze the popularity of search terms to see what's trending in your industry. It's free and can help you pinpoint topics and products that are in demand, so you can stay ahead of the curve.

Hover

Secure the perfect domain name for your website. Hover's straightforward search and checkout process makes it easy to find and register a domain that matches your brand.

Paperform

Create beautiful, branded forms and workflows, from client surveys to event RSVPs. Starting at \$20/month, it's a flexible tool to keep your operations looking professional and organized. There is also electronic signature software.
